Subject - American History Grade Level – 8/9

Day of the Week	Covered in Class
Monday	Discussion of President Lincoln's Second Inaugural Address; Study of "Presidential Reconstruction" vs. "Congressional Reconstruction" TEXTS NEEDED: <i>Land of Hope</i> textbook and workbook.
Wednesday	Discussion of the Civil War Amendments and the Impeachment of President Andrew Johnson. Take Home Quizzes will be passed out in class. Parents: See note below for details. TEXTS NEEDED: Same as Monday

Day of the Week	Home Assignments
Tuesday	Read <i>Land of Hope</i> , pp. 197-199. Also read the Fourteenth Amendment on pp. 118-119 of the Workbook, and type out responses to Questions #1-5 on p. 119.
Thursday	Study for the Quiz—it covers everything we've studied related to the Civil War and Reconstruction.
Friday	Study and Take the Quiz some time over the weekend.

Parents: **Your child's first history quiz is being sent home Wednesday in a sealed envelope, with my church's (Stoneridge Covenant Church) official stamp across the seal. Your student should give you the quiz so you may open and give it to them in a testing environment. This means it should be proctored in a central location, in sight of the adult and all class materials should be removed from that area to avoid temptations. They have as much time necessary to complete the quiz, but it must be done in one sitting, so please make sure they have enough time to complete it. (It shouldn't take more than 45 minutes). When finished, please enclose the quiz in a sealed envelope with your signature across the seal, letting me know that it was appropriately monitored. The quiz must be returned to me in class no later than Wednesday, October 9.**

This will be a more difficult week for most of the students. Word problems can be a challenge.

Remind the students that there are geometry formulas in the front and back of their book. None of these formulas will need to be memorized for Chapter 2, but it would be a good idea to put some on a notecard. They will need these formulas next year.

Also difficult is the task of solving for a specified variable, (or solving a literal equation). It helps them quite a bit to just think of it as "rearranging" the equation. See ex. 6 on p.151 This idea of *solving* and not getting a number answer is mysterious for now. They have some background in arithmetic with "fact families". If $3 + 2 = 5$ then $3 = 5 - 2$. So if $x + 2 = y$ then $x = y - 2$. They have **solved for x** even though x doesn't equal a number.

The students should always be studying the examples in the book and reading the material. I can tell already that some of them are doing just that! If they need to spend more than 5 hours per week on studying and assignments, please inform me.
