

Procedures for School Outbreak Cleaning Activities

1. Gather all equipment, cleaning solutions and materials required to clean the room.
2. **WASH** hands and put gloves prior to entering the room. Personal protective equipment should be changed if torn or soiled and between classrooms.
3. Place wet floor sign at the door entrance.
4. Pick up garbage in room and place in a regular garbage bag.
5. Visible or gross soil present and/or blood or body fluid spills must be removed prior to cleaning.
6. Clean all furniture, bed, table, basin and all bathroom fixtures. Focus on all high touch areas, knobs, switches, buttons, etc. and everything that is touched in the bathroom ensuring that clean cloths and solutions do not become contaminated (NO DOUBLE DIPPING) with the AHP Solution. Allow surfaces to remain wet for 30 seconds to achieve the 30-second Broad-Spectrum Sanitizing claim.
7. **Disinfect** all furniture, bed, table, basin and all bathroom fixtures. Focus on all high touch areas, knobs, switches, buttons etc. and everything that is touched in the bathroom ensuring that clean cloths and solutions do not become contaminated (NO DOUBLE DIPPING) with the AHP Solution. **Reapply the AHP Solution and allow surfaces to remain wet for 5 minutes to achieve the Bactericidal and Virucidal claim.**
8. Restock dispensers.
9. Spot wipe all walls, high to low with the AHP Solution.
10. Soiled rags should be placed in a regular plastic bag and then in regular soiled linen bin or the dirty utility room. Take all garbage bags to the appropriate disposal area.
11. Remove and discard gloves, WASH hands prior to leaving the room.
