

3rd & 4th Grade Summer Work

Math: practice addition, subtraction, multiplication, and division facts (MobyMax). Use as many opportunities as you can to practice money and time telling skills!

LA: pick a historical fiction novel about American history (preferably from 1865-2011) to read over the summer. Be prepared to share a 1–2-minute presentation on the book – what it was about and a scene you liked the most from the book.

Have a great summer!
