

SOY CANDLES & WAX MELTS

- * Utilizing American-produced soy which supports local farmers and American made glass jars.
- * Never any chemical stabilizers or synthetic dyes used in our candles or wax melts
- * Pure cotton braided wicks, without metals or chemicals.
- * Crafted with only CandleScience Clean Scents™ in all of our products. These are free from carcinogens, reproductive toxins and other potentially hazardous chemicals.
- * Containers are fully recyclable.
- * Candles are produced in small batches, locally, by a small family-owned business in Columbiana County Ohio

SOY CANDLES & WAX MELTS

Our hand poured candles and wax melts are made with sustainable, clean burning soy. We proudly use only American produced soy that meets the highest standards in candle making.

We do not use dyes or chemical stabilizers in any of our candles or wax melts. Our wicks are made of braided cotton and never contain zinc. The classic Mason jars, metal lids and plastic wax melt containers are fully recyclable. These 8 ounce candles burn approx. 56 hours. Thank you for supporting our small family-owned business company.
