

The Trellis Project

bringing God glory. making disciples. sharing God's love.

Question Three

What is the proposed timeframe to start and complete this project?

Vessel Architecture is currently engaged in drawing up the construction plans, and we are securing formal bids from contractors. Our desire is to break ground on the educational expansion in Spring 2022 and to have the project concluded by late fall of this coming year. It's our desire to be teaching our children in this new space by this time next year.

Depending on how the Lord leads and provides, this may mean that we will begin focusing on the second (and/or third) phase soon after completing the first, or it may mean that we find our present facility to be sufficient to meet our needs as a church. It is going to be the Lord's clear direction - rather than our desires or plans - that will determine the speed of future phases. Our intention is to follow the Lord's direction in this, even while pursuing good stewardship of the opportunities He brings to us.
