

The Trellis Project

bringing God glory. making disciples. sharing God's love.

Question Four

If we partner with Wildwood, does that create a problem for us down the road with governmental intrusion?

This is indeed a concern that we will be assessing as we move forward. To date, the City of Wildwood has not agreed to a specific level of involvement. Our desire has been to show a cooperative spirit with them to demonstrate the heart of our church (which is to make an impact within our community) by fulfilling our mission statement that says we exist “to share the love of Christ.” As we talk about specific potential partnerships with Wildwood, we will be carefully assessing this question (in consultation with legal counsel) to ensure that whatever partnership may be formed does not open the door to future governmental intrusion into our property or worship services.
