

2084 AI and the Future of the Human Race

Summary Sessions 4 and 5

Bright Future of AI?

- Reality vs Hype – Much progress but too much optimism
- Upside and Downside in all things
- Upside very positive in the medical field with wonderful advances

Downside – who establishes the values morally and ethically?

- AI can not reason nor understand their data that is collected and analyzed.
- AI does not have “deep learning systems” at the present.
- Limitations – employment interviews – non personal
- Data Harvesting for Capitalism – for profit – surveillance and tracking of your life habits for sale
- Data Harvesting for Communism – for control and power over the populace
- AI is advancing so fast that reflection on the impact and negative have had no real dialogue
- Will AI replace human work?

Scripture – Revelation Chapter 13
