

INTRODUCTION

Gahima Parish is one of the parishes of the Anglican Church of Rwanda Kibungo Diocese and it is made of 4 sub-parishes with 4800 Christians in total. It is located in the rural area surrounding the Kibungo town. Children from families of Gahima Parish are challenged by the lack of Nursery and Primary Schools where their children can get quality education.

For helping these children, the Church welcomed them from surrounding families and tried to care for them and give them pre-education using the old Church of the Parish. The old Church was divided in three rooms using Triplexes to accommodate three levels of Nursery (Baby class, Middle class & Top class). These three classrooms accommodate 182 children who are now in holidays.

The old church of Gahima Parish accommodate 182 children

Children who receive pre-primary education using the old church

Three classrooms created from the old church by dividing it using triplexes

The projection of the Church is to build a proper school where these children and others from surrounding families receive quality education with Christian values in order raise a God fearing generation from these children.

The master plan of the church projection desired school

The school will be built near Gahima Church Parish where trees are found

The Bishop of Kibungo Diocese prayed on the site asking Almighty God to provide all the needs for this project. Bishop was with the pastors of Gahima parish (All Saints church Gahima parish) and other people already hired to uprooting the tress.

Conclusion

We need prayers that God provides building materials to build this school and our desire is to begin building in October this year. We hope to begin with all classes, and if we fail, we begin with four classrooms to get ready for children to use in January 2022.
Blessings!!!
