

FREE ADMISSION

SUNDAY, NOVEMBER 22

6:00 PM

GUEST SPEAKER

DR. JASON LISLE

UNDERSTANDING GENESIS

Does Genesis really matter? Are the details of creation important, or are we free to believe in evolution so long as God did it? Far from being merely an academic issue, the creation-evolution debate is a matter of biblical authority. Is the Bible really the inerrant Word of God, or has it been disproved by science?

About Dr. Lisle:

Dr. Jason Lisle, founder of Biblical Science Institute, is a Christian astrophysicist who researches issues pertaining to science and the Christian Faith. Dr. Lisle has always desired to serve the Lord out of love and gratitude for salvation, and to spread the Gospel message to all people. Dr. Lisle double-majored in physics and astronomy with a minor in mathematics at Ohio Wesleyan University. He then went on to obtain a master's degree and Ph.D. in astrophysics at the University of Colorado in Boulder. There, he used the SOHO spacecraft to analyze the surface of the sun, and made a number of interesting discoveries, including the detection of giant cell boundaries. Dr. Lisle has published several books, plus articles in both secular and creationist literature.
