

Banaba House Ministry Center - *Renovations*

Our hard-working crew. Kuya Marlon & Kuya Jesse (from right going left) built our original structures. It was a miracle that our need and their availability aligned. And then Jona, our ever-ready Forman, excellent with details and oversight. We have a small troop of guys that are helping with all kinds of smaller tasks.

Materials delivery; metal, hollow-blocks, cement, sand, sawali, and more.

We are adding a second floor for sleeping with a wall in the middle. One side for gals and the other for guys. We have added two new bathrooms. We will finish the walls with traditional Filipino sawali (woven bamboo) walls with large swing up windows.

These are an example of sawali wall construction from my home on the 3rd floor of our ministry center.
